No. 34 - Pat Sin Range

Site

The site is the forested ravines on the northern slopes of Pat Sin Range. The area is about 128 hectares.

Date of Designation

5 February 1980

Special Scientific Interest

The forested ravines are interesting floristically where rare species are known.

The stand of Cunninghamia lanceolata in one ravine is possibly natural.

Degree of Hazard

There is a risk of fire damage.

Recommended Protection Measures

The site is within the Pat Sin Country Park. Priority should be given to the protection of the site within the framework of country park services.
